

Adding Video Link to Member Profile

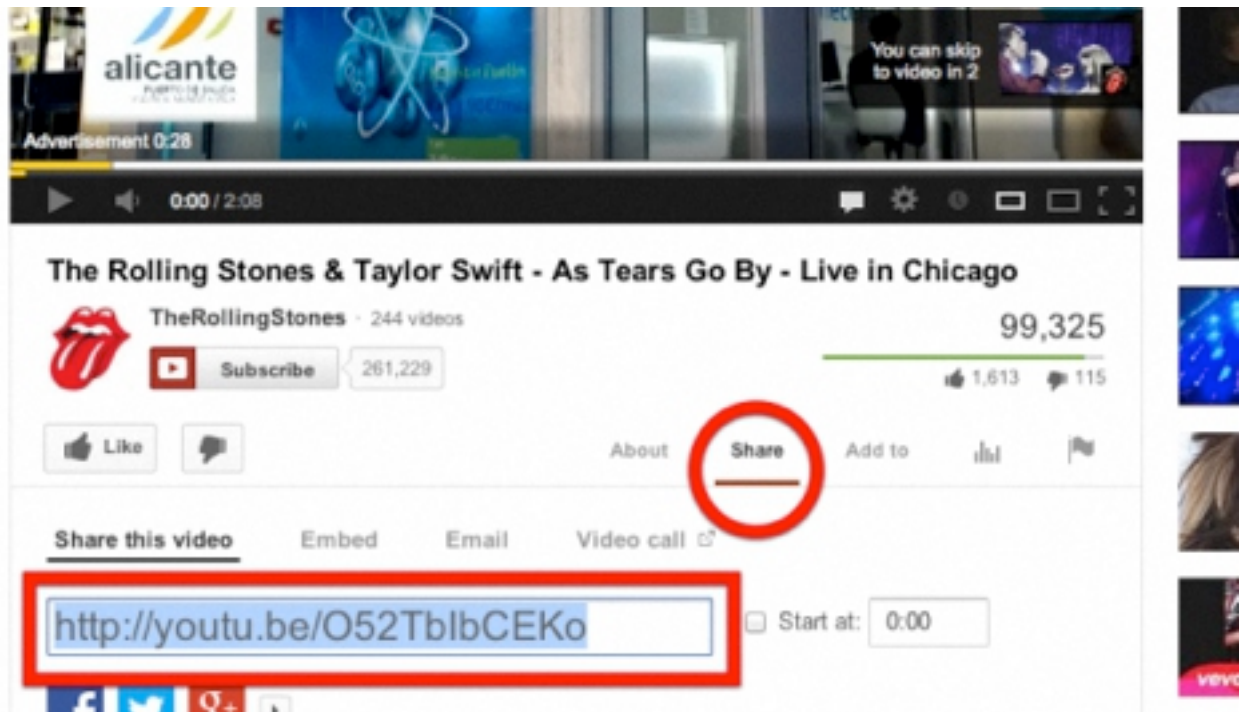

1. Login to the members area and go to profile page
2. Click the EDIT link and select UPDATE YOUR PROFILE

3. Click the VIDEO tab and paste the video code in the WATCH VIDEO field, Click UPDATE when done.

The video code should be taken from the video sharing site. The illustration on the next page shows where it should be taken from in a YouTube page.

1. Click the SHARE link and copy the link code.

If the video cannot be seen when the profile page is viewed, then it may be that the video link requires Moderation - in other words, an Administrator may have to approve the video. This is done through the CB Control panel in the back-end of the site.

If you can ask the guy in Georgia to reactivate my administrator account, or ask Richard to do it, I can go in myself and check it out.
